Basic Information: Your withholding rate is determined by the type of payment you will receive.

- For nonperiodic payments, the default withholding rate is 10%. You can choose to have a different rate by entering a rate between 0% and 100% in the Federal Withholding section of the Distribution Form. Generally, you can't choose less than 10% for payments delivered outside the United States and its possessions.
- For an eligible rollover distribution, the default withholding rate is 20%. You can choose a rate greater than 20% by entering the rate in the Federal Withholding section of the Distribution Form.

Purpose of Form. Form W-4R is for tax payer to withhold the correct amount of federal income tax from nonperiodic payments or eligible rollover distributions from an employer retirement plan, annuity (including commercial annuity), or individual retirement arrangement (IRA). Do not use form w-4R for periodic payments (payments made in installments at regular intervals over a prior of more than 1 year_ from these plans or arrangements. Instead, use W-4P, Withholding Certificate for Period Pension or Annuity Payments. For more information on withholding, see Pub. 505, Tax Withholding and Estimated Tax.

Caution. If you have too little tax withheld, you will generally owe tax when you file your tax return and may owe a penalty unless you make timely payments of estimated tax. If too much is withheld, you will generally be due a refund when you file your tax return. Your withholding choice (or an election not to have withholding on a nonperiod payment) will generally apply to any future payment from the same plan or IRS.

2022 Marginal Rate Tables

You may use these tables to help you select the appropriate withholding rate for this payment or distribution. Add your income from all sources and use the column that matches your filing status to find the corresponding rate of withholding.

Single or Married filing separately		Married filing jointly or Qualifying widow(er)		Head of household	
Total income over --	Tax rate for every dollar more	Total income over --	Tax rate for every dollar more	Total income over --	Tax rate for every dollar more
\$0	0%	\$0	0%	\$0	0%
12,950	10%	25,900	10%	19,400	10%
23,225	12%	46,450	12%	34,050	12%
54,725	22%	109,450	22%	75,300	22%
102,025	24%	204,050	24%	108,450	24%
183,000	32%	366,000	32%	189,450	32%
228,900	35%	457,800	35%	235,250	35%
552,850*	37%	673,750	37%	559,300	37%

* If married filing separately, use \$336,875 instead for this 37% rate.

Nonperiodic payments—10% withholding. Your payer must withhold at a default 10% rate from the taxable amount of nonperiodic payments unless you enter a different rate on line 2. Distributions from an IRA that are payable on demand are treated as nonperiodic payments. Note that the default rate of withholding may not be appropriate for your tax situation. You may choose to have no federal income tax withheld by entering “-0-” on line 2. See the specific instructions below for more information. Generally, you are not permitted to elect to have federal income tax withheld at a rate of less than 10% (including “-0-”) on any payments to be delivered outside the United States and its possessions.

Note: If you don't give Form W-4R to your payer, you don't provide an SSN, or the IRS notifies the payer that you gave an incorrect SSN, then the payer must withhold 10% of the payment for federal income tax and can't honor requests to have a lower (or no) amount withheld. Generally, for payments that began before 2022, your current withholding election (or your default rate) remains in effect unless you submit a Form W-4R.

Eligible rollover distributions—20% withholding. Distributions you receive from qualified retirement plans (for example, 401(k) plans and section 457(b) plans maintained by a governmental employer) or tax-sheltered annuities that are eligible to be rolled over to an IRA or qualified plan are subject to a 20% default rate of withholding on the taxable amount of the distribution. You can't choose withholding at a rate of less than 20% (including “-0-”). Note that the default rate of withholding may be too low for your tax situation. You may choose to enter a rate higher than 20% on line 2. Don't give Form W-4R to your payer unless you want more than 20% withheld.

Note that the following payments are not eligible rollover distributions: (a) qualifying “hardship” distributions, and (b) distributions required by federal law, such as required minimum distributions. See Pub. 505 for details. See also Nonperiodic payments—10% withholding above.

Payments to nonresident aliens and foreign estates. Do not use Form W-4R. See Pub. 515, Withholding of Tax on Nonresident Aliens and Foreign Entities, and Pub. 519, U.S. Tax Guide for Aliens, for more information.

WITHHOLDING NOTICE INFORMATION (CONTINUED)

Tax relief for victims of terrorist attacks. If your disability payments for injuries incurred as a direct result of a terrorist attack are not taxable, enter “-0-” on line 2. See Pub. 3920, Tax Relief for Victims of Terrorist Attacks, for more details.

Specific Instructions For an estate, enter the estate’s employer identification number (EIN) in the area reserved for “Social security number.”

More withholding. If you want more than the default rate withheld from your payment, you may enter a higher rate on line 2.

Less withholding (nonperiodic payments only). If permitted, you may enter a lower rate on line 2 (including “-0-”) if you want less than the 10% default rate withheld from your payment. If you have already paid, or plan to pay, your tax on this payment through other withholding or estimated tax payments, you may want to enter “-0-”

Suggestion for determining withholding. Consider using the Marginal Rate Tables on page 1 to help you select the appropriate withholding rate for this payment or distribution. The tables are most accurate if the appropriate amount of tax on all other sources of income, deductions, and credits has been paid through other withholding or estimated tax payments. If the appropriate amount of tax on those sources of income has not been paid through other withholding or estimated tax payments, you can pay that tax through withholding on this payment by entering a rate that is greater than the rate in the Marginal Rate Tables. The marginal tax rate is the rate of tax on each additional dollar of income you receive above a particular amount of income. You can use the table for your filing status as a guide to find a rate of withholding for amounts above the total income level in the table. To determine the appropriate rate of withholding from the table, do the following. Step 1: Find the rate that corresponds with your total income not including the payment. Step 2: Add your total income and the taxable amount of the payment and find the corresponding rate.

Privacy Act and Paperwork Reduction Act Notice. We ask for the information on this form to carry out the Internal Revenue laws of the United States. You are required to provide this information only if you want to (a) request additional federal income tax withholding from your nonperiodic payment(s) or eligible rollover distribution(s); (b) choose not to have federal income tax withheld from your nonperiodic payment(s), when permitted; or (c) change a previous Form W-4R (or a previous Form W-4P that you completed with respect to your nonperiodic payments or eligible rollover distributions). To do any of the aforementioned, you are required by sections 3405(e) and 6109 and their regulations to provide the information requested on this form. Failure to provide this information may result in inaccurate withholding on your payment(s). Failure to provide a properly completed form will result in your payment(s) being subject to the default rate; providing fraudulent information may subject you to penalties.

¹ If you tell us not to withhold federal income tax, we won't withhold any amount for state income tax unless your state specifies a different policy.

² Digital Trust withholds the minimum amount required by Connecticut, unless we receive Form CT-W4P.

³ Follows the cumulative withholding rule.

⁴ If the total distribution amount is less than \$6,000 for the year, no state tax is applied. However, once the total is \$6,000 or more, state tax is calculated on the entire balance to date. Nonperiodic payments are taxed at 5% of your distribution amount.

⁵ Mississippi requires state income tax withholding only if you've taken an early or excess distribution subject to the 10% federal penalty tax. State tax withholding isn't permitted in Mississippi for any other distribution types.

⁶ If withholding is taken for Oregon, the minimum amount is \$10.
